#### GROVER & BAKER'S FAMILY SEWING MACHINES, Promotes the leisure, health and happiness of home.

OFFICES: No. 15, Public Square. Nashville, Tenn., he Store formerly occupied by W. H. CALHOUN. No. 495, Broadway, New York. No. 18 Summer Street, Boston.

### Reason why this Machine is Universally

Preferred over All Others. 1 Because it is the only Sewing Machine in the world ever invented, so constructed as to fully meet the demands of families for general

2 It is very simple and is zever liable to get out of order. 3 It makes a seam which will not rip, though

every third stirch is cut. 4 It is not a Shuttle Machine. 5 It sews with two needles, making any length stitch desired.

6 It sews from two ordinary spools, and thus all trouble at winding thread is avoided; while the same Machine can be adapted at pleasure, by a mere change of spools, to all varieties of work. 7 The same Machine runs silk or linen

thread, and common spool cotton, with equal 8 Tois Machine will sew in the sleeves of a coat with the same ease and facility that it sews a straight seam.

9 This Machine can be run to make one thousand five hundred stitches per minute. 10 The seams are as elastic as the most elastic fabric, so that it is free from all liability to break in washing, ironing or otherwise.

11 The stiches made by this machine are more beautiful than any other made either by hand or machine. The price of these Machines at office in New York, range from \$75 to \$150; an additional

charge of \$10 only is made or each machine over New York prices at office in Nashville, to defray expenses of importation, &c., to Nash-R. U. BROCKWAY, Sec'y., Nashville Sewing Machine Company. of these Machines range fro 85 to \$150. Us ch 25-tf.

#### PATENT ELASTIC FIRE & WATER-PROOF CEMENT RODFING.

THE undersigned are prepared to introduce into use in Tenness e. W. F. CHILDS & CO.'S PAFFNT ELAS-TIC FIR AND WATER-PROOF CEMENT ROOFING, and ask the attention of Architects, Builders, Railroad Comies, and the public to examine its superiority over other

ARCHITECTS AND BUILDERS should not fall to examine this flooding, as it is belter and cheaper than any thing in over. The material forms a hard and smooth sur-face that will regat the action of the atmosphere in every imate. It is impervious to waler, clastic, and flexible, toontracts and expands with the changes of the a moshere, and will neither vaporate, crack nor rot; and, as to

the makell y, there is no question.

It is makell y, there is no question.

It is practically imperishable, and will perfectfully resist any ordinary exernal exposure to fire, as is abundantly proved, and we will warrant it water-proof. We will enage to put our Roofing on over ordinary good heathing, ild shincles, tar and gravel, tin, sinc, copper, or iron roof. - it making no difference how steep or flat they may be --for seven dollars per one hundred square feet; it being far theaper than any Roof of the old style, and we are sure it

It will also be found to be the best string ever invented to cove or mend o'd lesky tin, tar and gravel roofs, or around chimness, scattles, dormar windows, and gatters, where the chimners, scattles, dormar windows, and gatters, where the tin is rut if through. This Cement can be put on to last as long as stone, and form a perfect adveson to any object to which it is applied. Tin Roofs can be pa nied over (and warranted not to less) at two d liars and fifty cents per bundred square feet, which is cheaper and much better than paint. This Roofing will be found to be the best thoug for covering large Roofs where they are a xposed to fir —such as S cam Mills, Saw Mi is, Factories, Railroad Cars, Bridges. D pois Station Houses, Steambout Decks, and, in fact every kind of Roof where there is an external exposure from fire. As the Boof is perfect, without a joint in it, it present any chance for fire to communicate, and any ght sub-tance will burn out such out igniting.

Thousand Olics at Community and other place where Childs & Co.'s te sent has been used, insure Build-ings with Boofs over rel sith this Coment, at the same es as for those covere I with Iron, Cooper or Tin. The Came it will be fornished to those at a distance with directions for using.

To understead o the noder-igned, through the Postoffice, will be promptly attended to J. T. NATHURST.
